

Novre.

CONSIDERED — CRAFTED — QUIET

Product Catalogue - V1.2026

Novre.

Novre. is our premium D2C brand — the plates, switches, sockets, and regulators your room actually notices. Every module is BIS-certified and backed for fifteen years. Made in Ahmedabad, India considered by designers, priced with confidence.

Two Forms, One Design Concept.

CORE

AURA

Design language

Novre. is offered in two design lines, with distinctly different plate treatments.

CORE is the essential form — matte, unadorned, honest.

AURA is the same architecture framed in polished chrome — a considered edge that catches the light of the room.

Design that recedes into daily life.

CORE's restraint is not a matter of appearance alone. Careful engineering and hundreds of small decisions shaped how the plate feels and how it sounds — measured against the standards a designer notices before a homeowner ever does. The surface is not just quiet to look at; it is quiet to touch.

Made for the way you live.

AURA's presence is not a matter of ornament. Careful engineering and hundreds of small decisions shaped how the chrome bezel meets the plate, how the light of the room settles into that edge, how each operation registers under the hand. The bezel is not decoration; it is a frame. You feel the deliberate weight of the workmanship with every use.
